- 25X1 1. The Peiping Government has completed arrangements for the movement of the capital to Lanchou, Kansu, when war begins. They plan to import all strategic materials possible now for the future war for which they are perparing. Russia has so far refused to give China civilian goods but will ship all of the arms, tanks, etc., that China wants. In late August and September 1950 relations between the USSR and China were very strained, and a chance still exists that China may break away.
  - 2. The Chinese Communist army in Fuangei is committed to move into Indochina within a short time. Officers have been issued topographic maps of Indochina and are being briefed on the country.
